Felipe Saraiva

Full-stack Developer (backend focus)

Brazil (remote) | felipesaraivadossantos@gmail.com | saraivas.github.io | github.com/saraivas | dev.to/saraivas | linkedin.com/in/felipe-saraiva-dev

SUMMARY

Full-stack developer with a backend focus and 5+ years of experience across applied research, an internship and production work. Builds multi-tenant SaaS platforms with Python (FastAPI, Flask), PostgreSQL and React. Documents decisions in ADRs, tests behavior, and uses AI tools as a thinking partner while keeping design decisions and responsibility for the code. Based in Brazil, working in English (B1, improving), open to remote roles worldwide and to good opportunities in Brazil.

SKILLS

Languages: Python, SQL, TypeScript/JavaScript, C
Backend: FastAPI, Flask, Pydantic, SQLAlchemy, Alembic, REST APIs, authentication and authorization (Keycloak, RBAC), multi-tenancy, background jobs
Data: PostgreSQL, dbt, data ingestion and validation pipelines
Frontend: React, HTML, CSS
DevOps and quality: Docker, GitHub Actions, CI/CD, Azure, pytest, Vitest, Git
Practices: Architecture decision records (ADRs), code review, automated testing, security basics (CSRF, CSP, audit logging)

EXPERIENCE

IT Analyst, EnviroAsset (NewFields group)

Feb 2026 - Present | Remote

Multi-tenant SaaS platform for environmental risk and compliance.

- Build backend services and REST APIs (Python, FastAPI, PostgreSQL) and React interfaces for data visualization and compliance workflows.
- Built a centralized multi-tenant authentication and authorization service (FastAPI, Keycloak) with RBAC, token management and tenant switching.
- Built asynchronous data ingestion pipelines with quality controls, deduplication and regulatory validation rules.
- Maintain CI/CD with mandatory automated test gates, deployed on Azure with Docker.

Software Engineer (part-time contract), Constructer.ai

Jul 2025 - May 2026 | Remote

International, distributed team; AI-assisted document and issue-tracking platform.

- Built features for issue lifecycle tracking, event history, reporting and interactive dashboards.
- Implemented internationalization (i18n) and timezone-aware date handling.
- Contributed to AI-assisted workflows and document processing features in the product UI.
- Built backend endpoints with pagination and metadata for dashboard charts.

IT Analyst, NewFields Brasil

Sep 2023 - Jan 2026 | Porto Alegre, Brazil (hybrid)

Enterprise multi-tenant environmental compliance platform (the foundation of what became EnviroAsset).

- Built core modules (Flask, PostgreSQL): interactive geospatial mapping, time-series visualization, regulatory limits and automated reporting.
- Refactored the Flask web layer and added multi-language support (i18n) and granular role-based access control (RBAC).
- Hardened security with Content Security Policy, state-change protections and audit logging; standardized pytest test pipelines in CI.

Software Development Intern, HYGGE

Jan 2023 - Jul 2023 | Remote

- Contributed to internal web tools and automation scripts.
- Built and maintained responsive user interfaces with HTML, CSS and JavaScript.
- Assisted in backend and frontend integration tasks; worked with Git in a collaborative workflow.

Research Assistant, Federal University of Pelotas (UFPel), hydrology research group
Jun 2020 - Jun 2022 | Remote

- Contributed to IDFGeo, a web tool for intensity-duration-frequency (IDF) curves in hydrology (11,000+ equations, ~74,000 visits): gphidro.shinyapps.io/idfgeo
- Performed statistical analysis of large historical datasets in R; implemented probabilistic models and distribution fitting.
- Built a chatbot with the Rasa framework (NLP) as an academic project.

PROJECTS

tasklane-api - FastAPI REST API (Pydantic v2, SQLAlchemy 2, Alembic, PostgreSQL) with 26 automated tests and architecture decision records. github.com/saraivas/tasklane-api

orbitdesk-api (in progress) - multi-tenant task API focused on access isolation. github.com/saraivas/orbitdesk-api

EDUCATION

Bachelor's Degree in Computer Engineering, Federal University of Pelotas (UFPel), Apr 2017 - May 2023

LANGUAGES

Portuguese (native), English (B1, weekly classes)
